Surcharges

At Seed Solutions Seed Labs we don't believe in little add-ons that increase your costs. There are no surcharges for rush orders, cancelling an order, amended and additional reports, sending reports via phone, fax and email, and cleaning seed—within reason. We do reserve the right of an additional fee in extreme cases.

Seed Solutions Seed Labs is no ordinary seed lab. We adhere to the industry regulations and standards, always striving for excellence. This doesn't make us different, it only gives you the confidence to know your results are accurate. What makes us different is who we are. This business is run by Shanna and her dedicated family and staff. Shanna in conjunction with her parents own and operate Stolhandske Farms, a grain farm in south west Saskatchewan. Being an active farmer, as well as Shanna's extensive seed background, gives Seed Solutions Seed Labs a different perspective in seed testing. This background has led Seed Solutions Seed Labs to develop seed tests that better represent conditions in your field, therefore giving you better results. We also understand that the basics of seed testing is the bedrock of your operations – without the knowledge to manage your seed everything else is irrelevant. This is also the bedrock of our business, but we also strive to keep up to date on new technology and testing. We understand your seed testing requirements and what is important to you because our agronomic needs are the same as yours.
